

PRODUCT CHANGE NOTIFICATION

Ai PCN No: 156

Date Issued: November 10, 2020
Notice Type: Product Change
Product Type: Pulsar 320E

Change Notification Summary

Effective immediately, Advanced illumination's (Ai) Pulsar 320 is no longer available and will be replaced with the Pulsar 320E. The microprocessor used within the Pulsar 320 was discontinued so Ai was forced to replace it. To properly support this new microprocessor, an updated software revision is now required to operate new units. A link to this new software revision will be available on the Pulsar 320E product webpage under downloads. In Q3 of 2021, additional features will be added to the Pulsar 320E, including but not limited to improved commands, DHCP support and UDP functionality. To make the differentiation between the original Pulsar 320 and the new Pulsar 320E visually clear, Ai has updated the Pulsar 320E front labels to incorporate green as a primary color, as opposed to gray.

Please contact your Ai Sales Representative if you have any questions.
