

## README

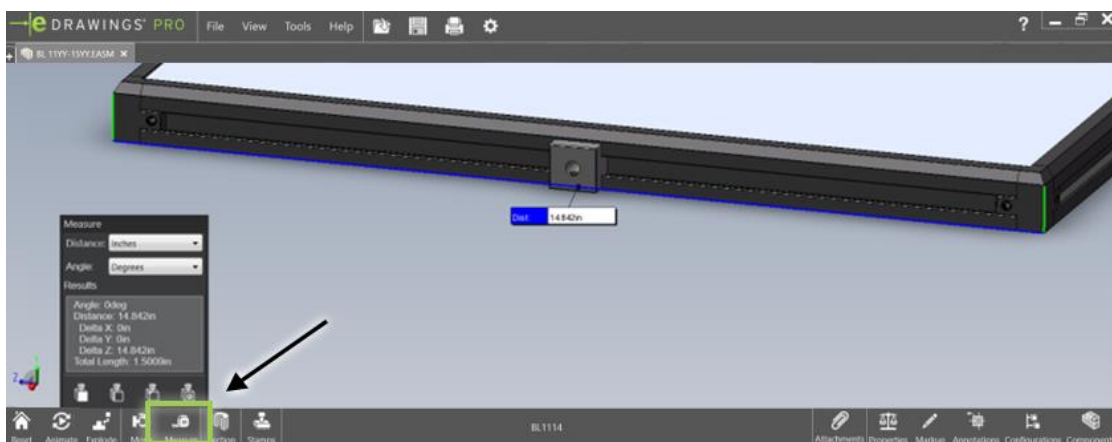

These EASM files were created to provide numerous step files in one downloadable asset. To use these EASM files, download eDrawings here: <https://www.edrawingsviewer.com/>. Choose “eDrawings Viewer” for consumers of CAD Data, and select the “eDrawings Viewer only”. No additional optional publishers needed.

After downloading the EASM files with the desired product sizes, they may be opened in eDrawings.

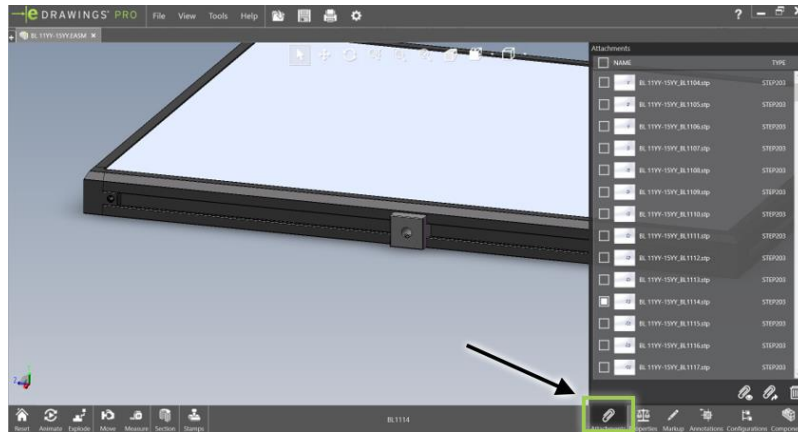

To select desired size, first navigate to the “Configurations” tab at the bottom and scroll to view sizes.

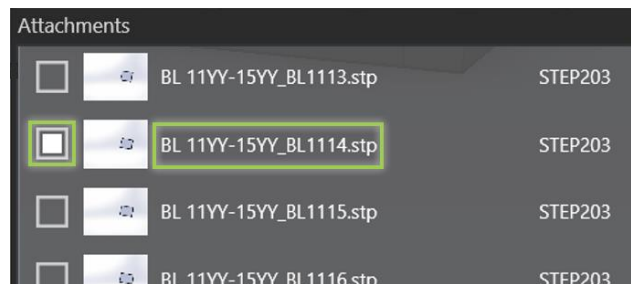

To view lengths and values of the light's surfaces, select “Measure”.

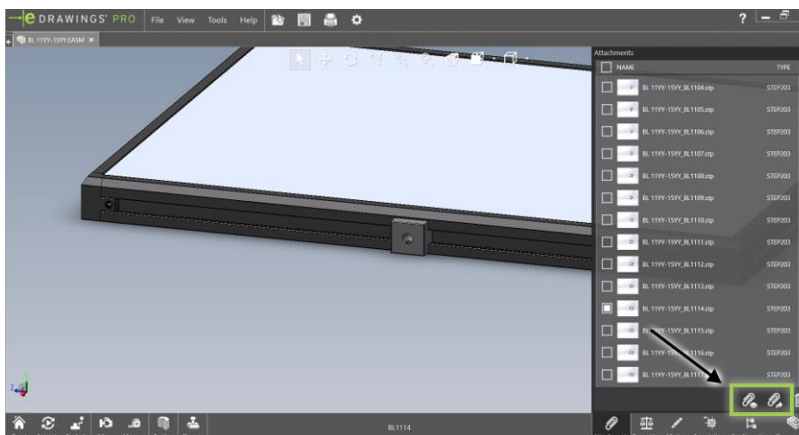

To export a step model, select the desired model from the “Attachments” tab.

The file name includes the Parent Assembly Group (i.e. BL 11YY-15YY in accompanying example) and indicates the Part Number (i.e. BL1114 in same example).

After selecting desired step model, an option is presented to either view the model or extract (download & save).

## CONTACT

Standard step files for select sizes are still available in the Downloads section of each Ai Product Page. Should you have difficulty downloading the files, require step files in sizes not provided, or have additional questions, please contact our Customer Service at [info@advancedillumination.com](mailto:info@advancedillumination.com).
